

REMARKS/ARGUMENTS

The Examiner is requiring restriction to one of the following groups:

- Group I: Claims 1-7, drawn to a biological substance-immobilized gel and method for preparing a biological substance immobilized therein;
- Group II: Claims 8-16, drawn to a gel-filled hollow tube, microarray and method for manufacturing a biological immobilized microarray; and
- Group III: Claims 17-19, drawn to a method for detecting a target.

Applicants hereby elect Group I, Claims 1-7, drawn to a biological substance-immobilized gel and method for preparing a biological substance immobilized therein, with traverse on the grounds that no adequate reasons and/or examples have been provided to support a conclusion of patentable distinctiveness between the identified groups. Also, it has not been shown that a burden exists in searching the claims of the three groups.

Moreover, the M.P.E.P. at § 803 states as follows:

“If the search and examination of an entire application can be made without a serious burden, the Examiner must examine it on the merits, even though it includes claims to distinct or independent inventions.”

Applicants respectfully submit that a search of all of the claims would not impose a serious burden on the Office.

Accordingly, and for the reasons presented above, Applicants submit that the Office has failed to meet the burden necessary in order to sustain the Restriction Requirement. Withdrawal of the Restriction Requirement is respectfully requested.

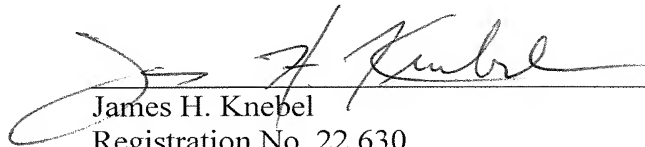

Applicants respectfully submit that the above-identified application is now in
condition for examination on the merits, and early notice of such action is earnestly solicited.

Respectfully submitted,
